4-H Headlines

Kaitlyn Slover, Cherokee CEA-4-H/YD

kaitlyn.slover@ag.tamu.edu

Wow, where has the summer gone?! I can't believe the new 4-H year has already started! All of our clubs are up and running and our members are already participating in events throughout the state. As we begin the new 4-H year, take some time to think about a few things:

- Why do I do 4-H?
- What can the 4-H program do for me?
- Am I taking full advantage of the 4-H program?

I want everyone to have the most successful year in 4-H that they can and by answering these questions it can better prepare you to do so!

DISTRICT 5 PRESENTS

SHELL-A-BRATE 4-H

AT JUNIOR LEADERSHIP CAMP

Open to enrolled 4-H members
3rd through 8th grades

OCTOBER 13-14, 2023
Camp Gilmont, Gilmer

Regular Registration open September 11 - October 1, 2023
texas4honline.com
\$100 per camper
\$75 per registered 4-H adult volunteer
Includes lodging, meals, activity fees & t-shirt

Late registration October 2-4, 2023
\$125 late registration - camper/\$100 late adult

**FOR INFORMATION, CONTACT YOUR LOCAL
COUNTY EXTENSION OFFICE OR D54-H.TAMU.EDU**

The members of Texas A&M AgriLife will provide equal opportunities in programs and activities, education, and employment to all persons regardless of race, color, sex, religion, national origin, age, disability, genetic information, sexual orientation, or marital status. Texas A&M AgriLife will strive to achieve full and equal employment opportunity throughout Texas A&M AgriLife.

**Come shell-a-brate 4-H with us at Junior
Leadership Camp,
October 13-14! Registration opens on
4HOnline September 11th.**

2023-2024 District 5 4-H Dates at a Glance

DATE	EVENT	LOCATION
Sep 8-9	District Council Officer Planning Retreat	Pineywoods Camp - Groveton
Sep 19	Contest Planning Work Day	District 5 Office - Overton
Sep 22-23	Shooting Sports Coach Training	Nacogdoches County
Oct 13-14	Junior Leadership Lab	Camp Gilmont - Gilmer
Oct 1-Mar 1	General Photography Contest	Virtual - Submittable

BREAKFAST CEU SERIES

Those in need of CEUs for their TDA Pesticide License can join us each month for our Breakfast CEU Meetings. Each meeting will be a “Dutch treat” breakfast and those in attendance will receive one hour of pesticide CEU credit.

There will be a one-time \$10 fee for attending the yearlong Breakfast CEU Series.

The following dates, times and locations have been set.

(Please note the 7 a.m. start time for the November meeting.)

Oct 17th	6:30 a.m.	Beverly’s Café, Jacksonville
Nov 21st	7:00 a.m.	Miss Mollie’s Diner, Alto
Dec 19th	6:30 a.m.	Cherokee Co Ext Office, Rusk

Farm Service Agency Reminds Texas Livestock Producers of Available Drought Assistance

Contact: joshua.coleman@usda.gov

Producers in more than 200 counties may be eligible

COLLEGE STATION, Texas, Sept. 12, 2023 – USDA’s Farm Service Agency (FSA) reminds drought impacted producers that they may be eligible for financial assistance through the Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP), Livestock Forage Disaster Program (LFP) Emergency Conservation Program (ECP) and Emergency Hay-ing and Grazing on Conservation Reserve Program to provide financial assistance to eligible producers for 2023 grazing losses due to a qualifying drought or fire and provide water for impacted livestock.

“Producers across Texas have been faced with another significant drought year causing considerable economic hardship as they go to great lengths to provide adequate feed, forage and water for their livestock,” said Kelly Adkins, State Executive Director for FSA in Texas. “Producers who are eligible for the much-needed disaster recovery assistance are encouraged to contact their local FSA office to schedule an appointment to apply.”

Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program

For eligible producers in qualifying counties, the ELAP provides financial assistance for:

- the transportation of water to livestock;
- the above normal cost of mileage for transporting feed to livestock; and
- the above normal cost of transporting livestock to forage/ grazing acres.*

*No payment for “empty miles.”

Eligible livestock include cattle, bison, goats and sheep, among others, that are maintained for commercial use and located in a county where qualifying drought conditions occur. A county must have had D2 severe drought intensity on the U.S.

Drought Monitor for eight consecutive weeks during the normal grazing period, or D3 or D4 drought intensity at any time during the normal grazing period. Producers must have risk in both eligible livestock and eligible grazing land in an eligible county to qualify for ELAP assistance.

Transporting Water, Feed and Livestock

For ELAP water transportation assistance, producers must be transporting water to eligible livestock on eligible grazing land where adequate livestock watering systems or facilities were in place before the drought occurred and where water transportation is not normally required. ELAP covers costs associated with personal labor, equipment, hired labor, and contracted water transportation fees. Cost of the water itself is not covered. The ELAP payment formula uses a national average price per gallon.

ELAP also provides financial assistance to livestock producers who incur above normal expenses for transporting feed to livestock and who are hauling livestock to a new location for feed resources due to insufficient feed or grazing in drought-impacted areas. For transporting feed or hauling livestock, the payment formula excludes the first 25 miles and any mileage over 1,000 miles.

Reimbursement Rates

The reimbursement rate for transporting water, feed, and livestock is 60% of the costs above what would normally have been incurred during the same time period in a normal (non-drought) year. Eligible underserved producers with a CCC-860 underserved producer certification form on file with FSA may qualify for a 90% reimbursement rate.

An online tool is now available to help ranchers document and estimate payments to cover feed and livestock transportation costs caused by drought and view the demonstration video.

Reporting Losses

Producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent. Producers should contact FSA as soon as the loss of water or feed resources are known.

For ELAP eligibility, documentation of expenses is critical. Producers should maintain records and receipts associated with the costs of transporting water to eligible livestock, the costs of transporting feed to eligible livestock, the costs of additional feed purchases, and the costs of transporting eligible livestock

to forage or other grazing acres.

The deadline to apply for 2023 ELAP is Jan. 30, 2024.

Livestock Forage Disaster Program

The Livestock Forage Disaster Program (LFP) provides payments to eligible livestock producers and contract growers who also produce forage crops for grazing and suffered losses due to a qualifying drought or fire during the normal grazing period for the county. Eligible livestock include alpacas, beef cattle, buffalo/bison, beefalo, dairy cattle, deer, elk, emus, equine, goats, llamas, ostriches, reindeer, or sheep that have been or would have been grazing the eligible grazing land or pastureland during the normal grazing period.

More than 200 Texas counties have met the drought severity levels that trigger LFP eligibility for the 2023 program year. For LFP, qualifying drought triggers are determined using the U.S. Drought Monitor. A list of eligible counties and grazing crops can be found on the FSA Texas webpage.

To expedite the application process, producers are encouraged to gather and submit records documenting 2023 losses. Supporting documents may include information related to grazing leases, contract grower agreements, and more.

The deadline to apply for 2023 LFP assistance is Jan. 30, 2024.

Emergency Conservation Program

FSA offers cost-share assistance to livestock producers experiencing severe drought conditions where water available for livestock has been reduced below normal to the extent that, without access to additional water, livestock survival is threatened.

Approved practices may include installing pipelines or other facilities for livestock water, constructing and deepening wells for livestock water, installing portable electric pumps and developing springs or seeps for livestock water.

A producer qualifying for ECP assistance may receive cost shares not to exceed 75% of the approved payment scenario rate. Eligible underserved producers with a CCC-860 underserved producer certification form on file with FSA may qualify for a 90% reimbursement rate. Cost-share assistance is limited to \$500,000 per person or legal entity per natural disaster.

Friday, November 17th

Rusk Co Expo | 3303 FM 13 W | Henderson

TEXAS A&M
AGRI LIFE
EXTENSION

Fall gardening checklist:

- Sustaining adequate moisture in the garden and landscape is the #1 priority for late summer and fall, 2023. Water trees and shrubs by giving them at least one inch of water per week, delivered slowly, around the plants as far out as the "dripline" extends.
- Replenish mulches around trees and shrubs
- Rejuvenate heat-stressed geraniums and begonias for the fall season by lightly pruning, fertilizing, and watering.
- Don't allow plants with green fruit or berries to suffer from lack of moisture. Hollies will frequently drop their fruit under drought conditions.
- Prune out dead or diseased wood from trees and shrubs. Hold off on major pruning until midwinter. Pruning now may stimulate tender growth prior to frost.
- Divide spring-flowering perennials such as irises, Shasta daisies, gaillardias, cannas, day lilies, violets, liriope, and ajuga. Reset divisions into well prepared soil with generous amounts of organic material worked into the top 8 to 10 inches. Water in thoroughly.
- Prepare the beds for spring-flowering bulbs as soon as possible. It is important to cultivate the soil and add generous amounts of organic matter to improve the water drainage. Bulbs will rot without proper drainage.
- Chill tulip and hyacinth bulbs in the refrigerator until mid or late December before planting. The lower part of the refrigerator is best. Do not leave bulbs in airtight plastic bags during refrigerated storage.
- Plant bulbs in well prepared beds in October so the base of the bulb is at a depth that is three times the diameter of the bulb. In sandy soil, set slightly deeper and in clay soils less deeply.
- Plantings at this time can provide landscape color for three seasons in East Texas. Annuals set out early enough will bloom as soon as Thanksgiving, and frequently last until Memorial Day. Annuals that should soon be available in nurseries and garden shops include petunias, calendulas, pansies, snapdragons, stock, sweet peas, and violas (from seed).
- Christmas cactus can be made to flower by supplying 12 hours of uninterrupted darkness and cool nights (55° F) for a month, starting in mid-October. Keep plants on the dry side for a month prior to treatment. They should also be kept in total darkness from 5:00 pm until 8:00 am for about 30 days in October to initiate flower buds. After the dark time, keep them in a sunny spot where night temperatures can be kept below 65° F. Buds will drop if you allow night temperatures to go above 70° F or if you allow the plant to become excessively dry. (check out my class on 10/30) to hear more about this!)
- If you have saved seeds of your favorite plants, allow them to become air dry, then place them in an airtight container and store in the refrigerator. Be sure to label each packet carefully. Remember, seed from hybrid plants will seldom resemble the parent plant.
- Start cool-season vegetables, such as mustard, lettuce, arugula, broccoli, carrots, and turnips, from seed in well prepared beds.

Digging Deeper Into Gardening

DATE CHANGE FOR OCTOBER!

10/30 6:30pm—Fall fun—wildflowers (when and how to plant) amaryllis, poinsettias, and Christmas cactus.

11/20 6:30pm—Tree pruning: when, how, and why

Programs will be held via zoom. To register each month for the zoom, please click here: <https://agrilife.zoom.us/meeting/register/tJEkcumgpzwoGdwpWR4zzarADnsC-JsoVxil>

Big Bend and the Chihuahuan Desert

During our Horticulture Program Planning Conference, we had the opportunity to visit Alpine and get to know the horticulture of the area, including Sul Ross University, Chihuahuan Desert Research Institute and Big Bend.

Clockwise from top: Hort agents and specialist with the Entomologist at Sul Ross; Big Bend National Park entrance near Terlingua; Kelsey Wogen and Laura Miller in the greenhouse at Sul Ross University looking at caterpillars; the McDonald Observatory near Ft Davis; *Ferocactus pilosus*, Mexican fire barrel cactus; *Fouquieria splendens*, Ocotillo, rising above it's scrub brush neighbors in Big Bend National Park.

Passenger Safety in Cherokee County

Cherokee County has been busy with Passenger Safety over the past year holding car seat inspection events. The proper use of child safety seats reduces the risk of injury and death, leading to reduced medical costs, avoidance of lost future earnings, and improved quality of life. These economic benefits are an estimated \$2,859 per child age 0 to 4 and \$3,250 per child age 4 to 7 for new seats distributed, and \$766 per child for seat misuse corrected with an assumed 75% continued use. Based on this formula, the total economic impact for the Cherokee County Inspections September 2022 through August 2023 is \$194,101.
